UNITED STATES DEPARTMENT OF AGRICULTURE
FARM SECURITY ADMINISTRATION
HEALTH SERVICES PROGRAM
Activities of County, District and State Units
October - December, 1942.

LIBRARY
CURRENT SERIAL RECORD

This report covers activities during the months of October, November and December 1942 and marks a change from monthly to quarterly reporting on this program.

Resume of Membership Totals as of December 31, 1942

	Units	Counties	Families	Persons
Physicians' and Surgeons' Service only or in connection with other types of service	825	1059	109,408	574,741
Hospital Service only	10	16	2,379	13,206
Physician and Hospital	835	1075	111,787	587,947
Less Physician and Hospital *Duplications	6	7	794	3,950
Total Physician and Hospital		1068	110,993	583,997
Dental Service only	227	253	32,384	172,311
Physician, Hospital and Dental	1062	1321	143,377	756,308
Less Dental *Duplications	169	190	26,746	140,323
U. S. Total		1131	116,631	615,985

*In counties having two or more separate units offering different types of service, the membership in the smaller unit or units has been deducted on the assumption that these families hold membership in the larger or largest unit.

Extent of Program

At the end of December 1942 the FSA health services program had

1062 units in

1131 counties in

42 states with

116,631 different families and

615,985 persons holding membership.

This represents extension of the program during the quarter into an additional state - Delaware - where a unit offering hospital service has been set up to serve a three county area. There was also a net increase of three units in the program as a whole and the number of counties represented was increased by three during the quarter. The number of families holding membership at the end of December was however 603 less than the number at the end of September. This shows a continuation of the decrease in membership which was first noted in the report for September.

Services and Charges

Information on charges and payments for service and the volume of the different types of service received is found for the fourth quarter of 1942 in Table 1. The totals of approved charges and rates covering charges and services shown in this table are based on data from units which submitted reports for October, November and December. The membership of these reporting units and the percentage this membership represents of the membership of all units is shown below:

Units offering:	October		November		December		Average
	Member- Families	Per Cent	Member- Families	Per Cent	Member- Families	Per Cent	
Physicians' service alone or with other services	84,496	77.0	82,348	74.8	80,535	73.6	75.1
Hospital service only	1,795	75.2	1,521	63.9	1,406	59.1	66.1
Dental service only	20,527	63.7	20,506	63.6	19,921	61.5	62.9

Physicians' Service

The number of physicians' and surgeons' calls per 1000 persons per month during this fourth quarter is shown in Table 1 to be 101 and the charge for this service per eligible person was 29 cents. Both of these rates indicate a continuation in the reduction in volume of physicians' and surgeons' service already noted in the report for September. The corresponding rates for September were 105 calls per 1000 persons per month and charges per eligible person were 31 cents. During the fourth quarter of 1941 these rates were 120 calls per 1000 persons per month and 34 cents per eligible person or 16 and 15 percent respectively higher than the corresponding rates for this fourth quarter of 1942.

The percentage paid on physicians' and surgeons' charges during the quarter was 76.9 percent or 2.7 percent more than the 74.2 percent paid in September and this September rate was the highest which had been paid during the three years for which records are available. A rise in percentage paid on charges for service of course naturally follows a reduction in the volume of services for which charges are submitted.

Hospital Service

It will be noted that a separate section is given in Table 1 to units offering only hospital or hospital and surgical service. At the end of December there were ten such units in 16 counties with a membership of 2379 families, 13,206 persons. There is indication that these totals will be greatly increased during 1943. The percentage paid by these separate hospital units on charges for service was 93.6 percent and the volume of service reported was 16 days of hospitalization per 1000 persons per month. Units, offering hospital service in combination with physicians' service, report payment on charges for hospital service averaging 76.4 percent and services averaging 20 days hospitalization per 1000 persons per month. These latter rates compare closely with the corresponding rates shown for these units in previous months.

MEMBERSHIP VARIATION, JULY - DECEMBER, 1942

In view of the continued decrease in membership during the last few months of 1942 it is of interest to examine the trend from month to month during the period from June 30 to December 31, 1942 in the number of associations in operation, the number of counties represented and the membership in the various types of association and in all associations taken together. These monthly totals are as follows:

Month	No. of units	No. of Counties	No. of member-families in units offering services of:				Total Member-families
			(a) Physicians	(b) Hospital	(c) Dentists	Duplications (families)	
June	1014	1074	109,029	2,034	33,045	26,648	117,460
July	1053	1122	110,098	2,034	32,946	27,618	117,460
August	1056	1122	110,411	2,035	32,591	27,421	117,616
September	1059	1128	110,587	2,035	31,740	27,128	117,234
October	1060	1127	109,721	2,386	32,217	27,477	116,847
November	1065	1133	110,185	2,379	32,240	27,540	117,264
December	1062	1131	109,408	2,379	32,384	27,540	116,631

These totals indicate constant increase through November in the number of units in operation and the number of counties represented followed by a slight decrease in December. The number of member-families in all associations taken together increased through August and by the end of the year had decreased by 985 families from the August peak. The net loss in member-families during the half year was 829. This decrease in the number of different families participating in the health service program is countered by an increase of 892 families in the number holding membership in more than one association. This is shown by the totals in the column headed Duplications in the above table. The totals of membership in the associations offering different types of service are therefore not greatly affected by this over-all decrease.

The few associations offering hospital or hospital and surgeons' service increased in membership constantly during the period. The associations offering physicians' service alone or together with other types of service reached their peak membership in September and show a net gain of 379 families during the half year. The associations offering dental service only, lost members rather rapidly during the first part of the period but made some recovery during the latter part. They had a net loss during the period of 661 families. This gain of 379 families in the total membership of units offering physicians' service and loss of 661 families in the membership of units offering dental service does not adequately reflect the changes in membership of these two types of unit in the different regions and states. These regional and state changes are shown in Table 2 for units offering physicians' service and in Table 3 for units offering dental service.

-
- (a) Units offering physicians' services alone or with other types of service.
 (b) Units offering hospital or hospital and surgeons' service only.
 (c) See definition of duplications under Resume of Membership Total on page 1.

The outstanding regional gain in membership shown in Table 2 is that for Region IV, which added 27 medical care units and 877 families during the half year. Four of the five states in the region participated in this growth. The Region VIII portion of Texas also shows the addition of 13 new medical care units and 575 families. Other outstanding increases were one new unit in Oregon and a net gain of 612 families for that State and one new unit and a net gain of 1060 families in New Mexico. Region III and VII show losses of 1320 and 877 families respectively. All of the states in both regions participated in these losses. Regions II, V, VI and IX also showed losses in membership which were comparatively slight though for Region II the loss constituted 11.6 percent of the total membership.

These gains and losses are inclusive of gains and losses sustained through the addition of new units and dropping of terminated units. There was a total of 76 new medical care units with a membership of 6781 families added and 38 terminated units with a membership of 2872 families dropped during the half year. This excess in the membership of new units over that of terminated units not only accounts entirely for the net gain of 379 families but also counterbalances a net loss of 3530 families in the membership of units in operation throughout the period. This represents a 3.3 per cent loss in the membership of these older associations. All regions shared in this loss, the loss in the different regions ranging from two tenths of one percent of the membership of these associations in Region V to 28 percent in Region II. There were ten states - five of them in Regions V and VI - in which these established units were able to show a net gain in membership.

As has already been mentioned, the units, offering dental service only, (Table 3) suffered a net loss of 661 families or 2 percent of their membership during the half year. Rather heavy regional losses were reported from Regions II, V, VI, and IX and a considerable gain was reported from Texas in Region VIII. The loss in Region II is due to the completion of service to individual families for which special arrangement has been made and the failure to develop a continuing program after this special service was finished. The loss in Region IX is due to dropping from FSA lists a dental care association in Utah which is still in operation and in which FSA borrowers still hold membership but which cannot properly be considered to be under FSA sponsorship.

There was a total of seven dental units dropped during the period and 13 new ones added but the membership of the seven dropped units exceeded that of the 13 added ones by 445 families. This loss of 445 families combined with a loss of 216 families in the membership of units already in operation to make the total decrease of 661 families. This loss of 216 families by the units already in operation represented less than one percent of their membership, and, except for Region II of which mention has already been made, was distributed rather evenly among the regions.

Table 1. Activities of the FSA health service program through county, district and state units based on reports of units for the quarterly period October through December 1942.

- a/ Payments by units operating on a Capitation basis.
- b/ Membership totals for these units have been taken from reports for months other than December.
- c/ These units pay no more than fifty percent on charges at the end of each month or quarter, delaying further payment until the end of the year. The entry under Per cent paid for these units is the estimated percentage which could be paid if all funds available for payment of bills this month were distributed.
- d/ Total of members (persons) on the basis of which these rates have been estimated include the membership of all reporting units which offer hospital service regardless of whether or not hospital service was reported as having been rendered this month. For units in each state reporting hospital charges without reporting the number of days hospitalized, the number of days has been estimated by determining the cost per day for the days for which charges are reported. This average cost per day is then used in computing the number of hospital days for those units reporting charges only. For states having no units reporting number of days of hospitalization, no rate is given.

October, 1942

Newly Reported Units (Medical)

Region II

Minnesota; Mille Lacs County

Region III

Ohio; Henry County

Region IV

Kentucky; Metcalfe County

Trimble County

W. Virginia; Doddridge County

Berkley, Jefferson and Morgan
Counties, a 3-county unitTennessee; Greene County
Sevier County

Region VII

Nebraska; Holt County

Region VIII

Texas; Panola County

Wilbarger-Foard Counties, a
2-county unit

Region X

Wyoming; Goshen County

Northern Big Horn County

Region XI

Idaho; Lemhi County

Discontinued Units (Medical)

Region III

Ohio; Greene County

Champaign County

Iowa; Marion County

Illinois; Bureau County

Monroe and Randolph Counties, a
2-county unit

Missouri; Newton County

Callaway County

Greene County

Region IV

West Virginia; Wetzel County

Tennessee; Hickman County dropped from
Dickson-Hickman, a 2-county unit

Region VII

Kansas; Cheyenne County

Lincoln County

Neosho County

Rawlins County

Kiowa dropped from Edwards-

Kiowa, a 2-county unit

Nebraska; Lancaster County

Region IX

Utah; Juab dropped as a unit and added
to the Wasatch-Utah unit, making
a 3-county unit

Region XII

Texas; Gray-Wheeler Counties, a 2-
county unit

October, 1942 (Continued)

Newly Reported Units (Dental)

Region V

So. Carolina; Florence County

Region XII

Texas; Cottle County

Discontinued Units (Dental)

Region V

Georgia; Walton County

Region XII

New Mexico; Taos County

Newly Reported Units (Hospital)

Region I

Delaware; Sussex, Kent and
Newcastle counties, a
3-county unit

New York; Chenango, St. Lawrence and
Lewis Counties (Lewis dupli-
cated in another unit) a
2-county unit, which had
a separate hospital plan for
some time but is now included
in the general membership.

Region X

Colorado; Alamosa County

November, 1942

Newly Reported Units (Medical)

Region I

Maryland; Dorchester County
Wicomico, Worcester and
Somerset counties, a 3-county
unit

Discontinued Units (Medical)

Region IV

North Carolina; Beaufort County;
Davidson County;
Cabarrus County-
dropped from the 3-
county unit, Rowan,
Davies and Cabarrus.

November, 1942 (Continued)Newly Reported Units (Medical)

Region IV

North Carolina; Cabarrus County reported as a
new unit (formerly part of the
3-county unit Rowan, Davies and
Cabarrus).

W. Virginia; Pendleton County

Region X

Colorado; Kit Carson County

Newly Reported Units (Dental)

Region IV

Virginia; Macon County

Region XI

Oregon; Malheur County

December, 1942Newly Reported Units

None

Discontinued units (Medical)

Region III

Illinois; Henderson County

Region IV

North Carolina; Cumberland County
Robeson County
